

Project Idea Generator

Use a lens to focus your thinking. Focus on your local place, its problems, its people, possible partners, a personal interest, a passion.

Use the lens of time – past, present, possibility in the future. What profession will students model in their project? What learning needs does the student have?

Visit, investigate, read, imagine, connect the local/close/inward/familiar to what is more distant – city, state, country, world, universe – or unknown.

Think local to global, little to big, specific to general, real to concept, analog to digital, known to unknown. What engages you?

Lenses	Place	Problem	People	Partners	Personal	Passion
Past						
Present						
Possible The future or an idea or imagining						
Profession Student Role						
PLP Personal Learning Plan
